

SCRAM CAM Court Support Program

SCRAM Systems provides the most comprehensive Court Support Program for the most complex technology. SCRAM Systems supports SCRAM Continuous Alcohol Monitoring[®] (SCRAM CAM[®]) monitoring results in court at every level, and our team is available to offer expert testimony on the science of transdermal alcohol monitoring technology. That means incentives and sanctions can be verified and enforced based on the data received from the SCRAM CAM device, ensuring single-source admissibility, and eliminating the need for additional confirmation of a drinking event.

Our data and processes have been upheld as reliable and have met the standards of Daubert, Frye, and FRE 702 and 703 in every state in which it has been challenged. That includes state appellate and supreme court-level hearings.

SCRAM CAM Court Support Resources

- SCRAM CAM case law.
- State-specific Frye and Daubert rulings.
- Court reports on SCRAM CAM non-compliance events.
- An electronic library of supporting literature, including scientific studies on transdermal transport, SCRAM CAM laboratory studies, and SCRAM CAM field studies.
- Expert testimony: live, video, telephonic.
